reputational risk
posed by data
inaccuracies

Enhance
investor
confidence
and access to
sustainable
finance

Boost ESG
scores and
rankings
assessed by
ESG rating
agencies

**Assurance demonstrates your commitment to transparency,
accountability, and ESG leadership.**

Independent, high-quality assurance

Planning and risk assessment

We develop an understanding of your sustainability context and material ESG topics, request and review key documents, identify high-risk disclosures and data points and prepare an assurance plan and document sampling strategy.

Evaluation and analysis

We highlight inconsistencies, omissions and misstatements, re-request missing or clarifying evidence if it's needed, and prepare a summary of findings and recommendations.

Evidence gathering and testing

We review data collection processes and internal controls, conduct interviews with relevant staff, perform sampling and data verification and assess traceability and audit trails.

Quality review and reporting

We draft an assurance statement and report, conduct an internal quality review of all findings, working papers and conclusions, and deliver a formal assurance statement.

Meet regulatory requirements, improve ESG ratings and build stakeholder trust

Key deliverables:

A formal, independent assurance statement- for credibility with investors, regulators and rating agencies

- confirms the scope, criteria, and level of assurance (limited or reasonable);
- summarises the assurance methodology, key findings, conclusion, and opinion;
- is designed for external publication alongside your sustainability or ESG report.

A detailed report- your roadmap for continuous improvement

- identifies data quality issues, control weakness and reporting gaps;
- highlights opportunities to align more closely with evolving reporting frameworks;
- provides recommendations for improving future reporting cycles.

Why choose us?

Licensed assurance provider

Verco is an AA1000 AS licensed assurance provider.

Experienced team

We are familiar with assurance standards (AA1000AS, ISAE 3000, ISSA 5000) and reporting frameworks (GRI, IFRS, CSRD, CDP, GRESB, TCFD, etc.).

Technology-enabled

We use advanced data analytics for deeper insights.

Trusted by leaders

Read our case studies from top-tier clients to find out why we're trusted by industry leaders.
