

GRESB

Is this you?

You are a real estate asset owner, being asked by investors to submit your funds to the GRESB Real Estate or GRESB Infrastructure benchmarks. You need help with getting started, or specialist expertise on how to improve your score.

Benefits abound

We will help you navigate the detail around GRESB, making the process simple and pain-free. Your submission to GRESB will be prepared and checked to the highest standard, ensuring that your score and your benchmarking report reflect your organisation or fund's achievements, and give it the recognition it deserves.

The world is changing

With investors turning their eyes towards environmental benchmarking, GRESB participant numbers are rapidly growing. For instance, the 2024 real estate benchmark saw 2,223 entities participating worldwide, covering USD 7 trillion of GAV across 80 countries. The audience is growing too – GRESB data is used by over 170 institutional and financial investors with more than USD 51 trillion in assets under management. With participants going up and increasing scrutiny, the average GRESB scores are now plateauing – meaning intensifying competition for recognition and a growing need for GRESB expertise.

How we help

As a GRESB Premier Partner with many years of experience, we know the benchmark inside out. We can help you get started with data collection, assess the suitability of your company policies and documents as GRESB evidence, and craft responses to GRESB questions which are concise, to-the-point, and present your achievements in the best light. For more advanced participants, we will help you close the gap on scoring to achieve the coveted GRESB stars your investors want.
