Global Head of
Sustainability and Energy
Management

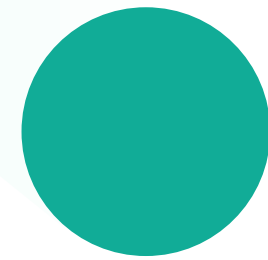

Sector related policies service

Is this you?

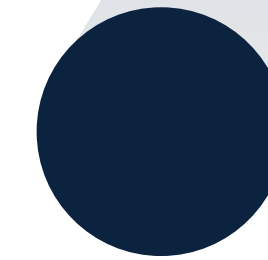

You are a concessionaire, public transport operator, infrastructure manager or work in a mobility supply chain that must translate sector policies into operational requirements and investment choices.

Drivers

New EU directives/regulations (e.g., Fit for 55, taxonomy), national/regional funding programmes (including recovery plans), and sector authority regulations are driving the need to take action on sustainability. Policies are changing rapidly which adds to the complexity- it's hard to keep up.

How we help

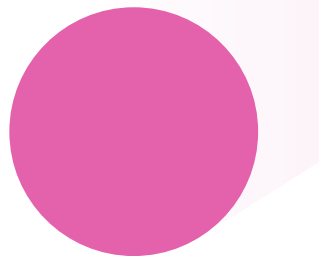

The expert team at BIP.Verco can support you. We have a combined policy tech team with experience in complex networks and assets.

Here are some examples of the work we do to support clients with policy:

- Conduct a regulatory monitoring and impact assessment;
- Positioning and responses to consultations;
- Translation into operational plans (compliance, investments, KPIs);
- National/European benchmarks.

Benefits

- Lower non compliance risk,
- better access to funds and tariff mechanisms,
- clearer investment prioritisation.
