

Contract energy manager service

“Secure expert, ongoing support that reduces energy costs, improves efficiency, and drives carbon reduction without needing a full-time in-house specialist.”

Tom Purkhardt
Head of Service
C&I Performance and
Resilience
Sustainable Transition

Contract energy manager service

A net zero cost service

Who this is for

- Engineering Managers/ Supervisors
- Facilities/ Maintenance Managers
- Environment/ SHE Managers
- Process/ Operations Managers
- Site Directors

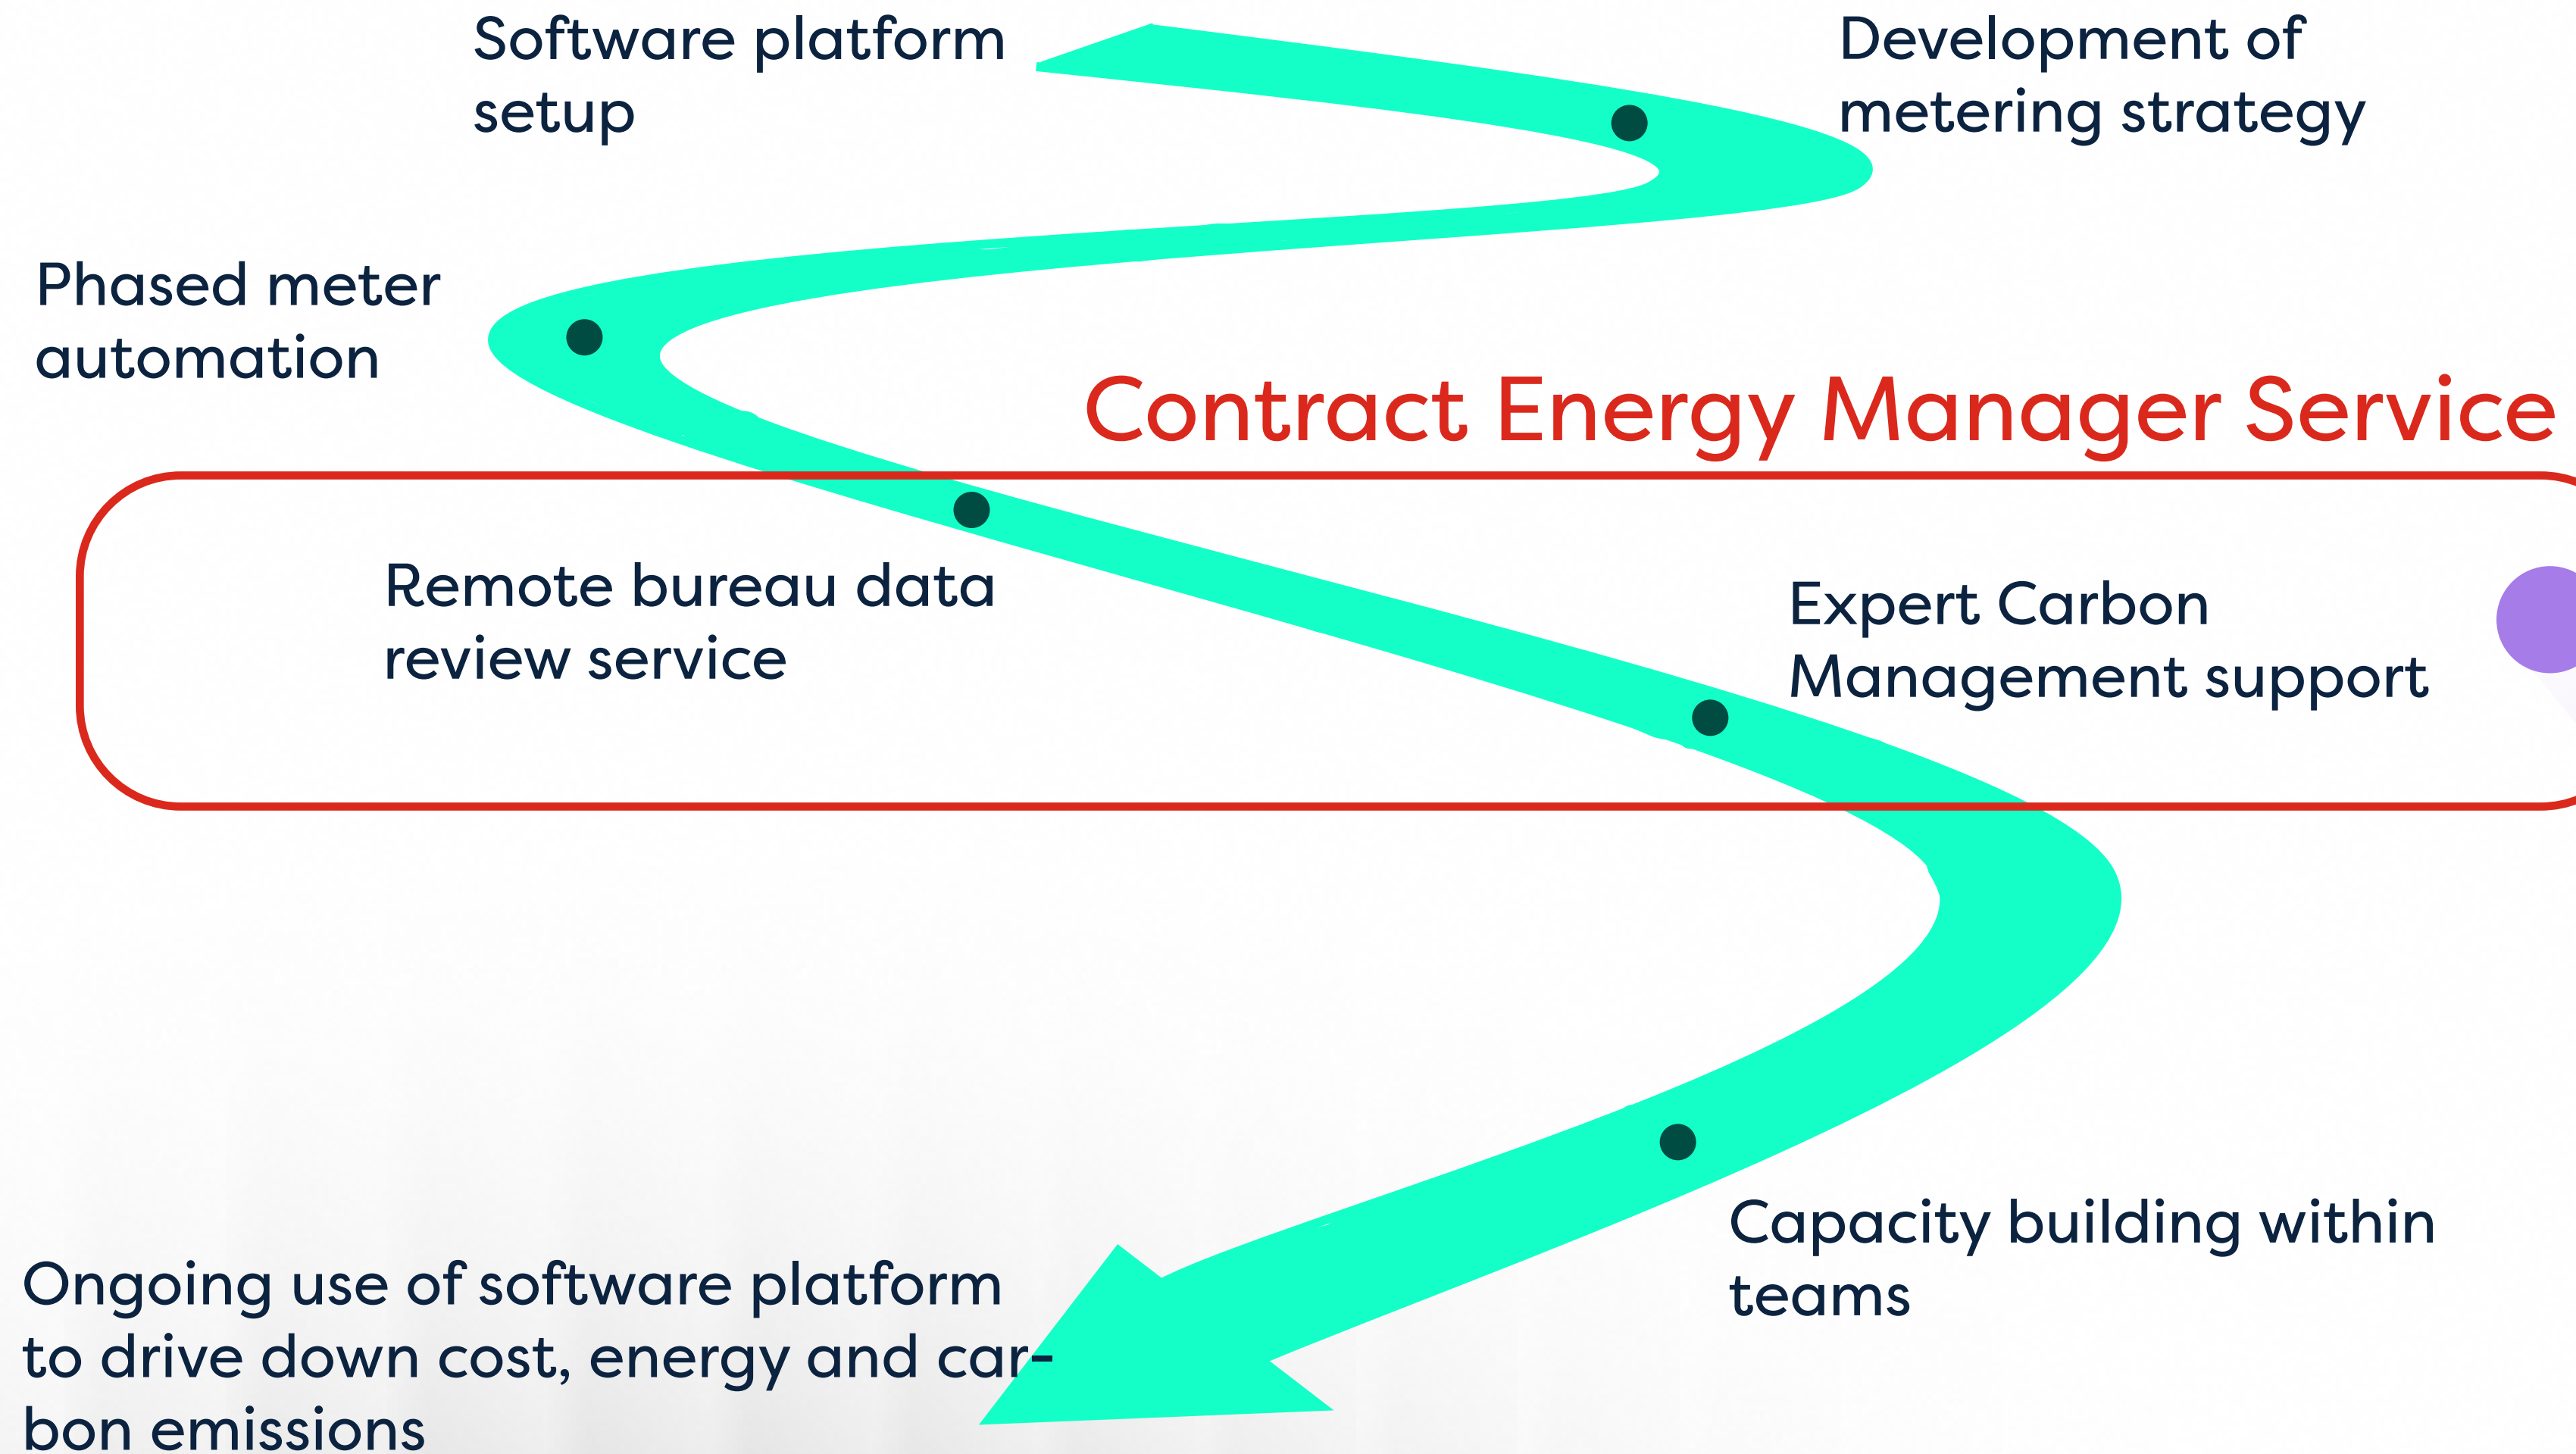

who want to use their existing data to save time, energy costs and carbon but don't have time to do it themselves (or need a hand with getting started).

The service in brief

With the Contract Energy Manager service, we work as part of your team to focus on energy improvements at your site. You can choose one of three tiers of involvement to suit your needs, time constraints and objectives. We have a proven track record with over 50 clients, delivering savings year on year. Read on for further details or contact your Verco account manager to discuss this service in the context of your own site and our widely implemented utilities management approach.

The typical site journey

4 reasons to use the service

Action identified

You no longer need to spend time reviewing your data for continuous improvement of your site because our team of experienced engineers will do it for you, transforming the data into digestible, actionable information.

Action delivered

The best projects will be identified and implemented for you on and offsite. We will work as part of your team, collaborating with the key players to put the plans into action.

Achieve targets

Quickly and efficiently achieve targets. Our combined years of project implementation experience means that we prioritise the right actions to ensure your targets are met quickly.

Savings exceed cost

Net zero cost. Because we know what works and can quickly achieve goals, the projects we work on with clients typically save more than the cost of the service.

Bureau review service

Finding time to identify the opportunities is a challenge

Engineering managers have many plates to spin. Although M&T software holds the key to cost reduction, with a lack of time and resource, crawling over the data is never a priority. Lack of time means the existing M&T system is under utilised and opportunities are missed.

The Verco reporting team love data

Our reporting team have a heady mix of expertise, context, insight and experience. We work for engineering managers as an extension of their team, to identify those opportunities. We can deliver and verify them too. Our approach is tried and tested from our long-term relationships with manufacturers around the world. In fact, we monitor 3 million data points every month.

Seize the opportunities

Over 8% typical energy input reductions identified
Over 5% typical water usage reduction identified
Targeted opportunity identification for maximum impact to reduce site consumption

Action delivered

Monthly Review with site team

Review of bureau report to give in-depth insight to build on positive trends, close out exceptional events and track opportunities. Regular point of contact to check in with site.

M&T system health check

Ongoing review to ensure reporting is fit for purpose. Maintain data health and pro-actively report potential issues.

Tailored energy management support throughout the year

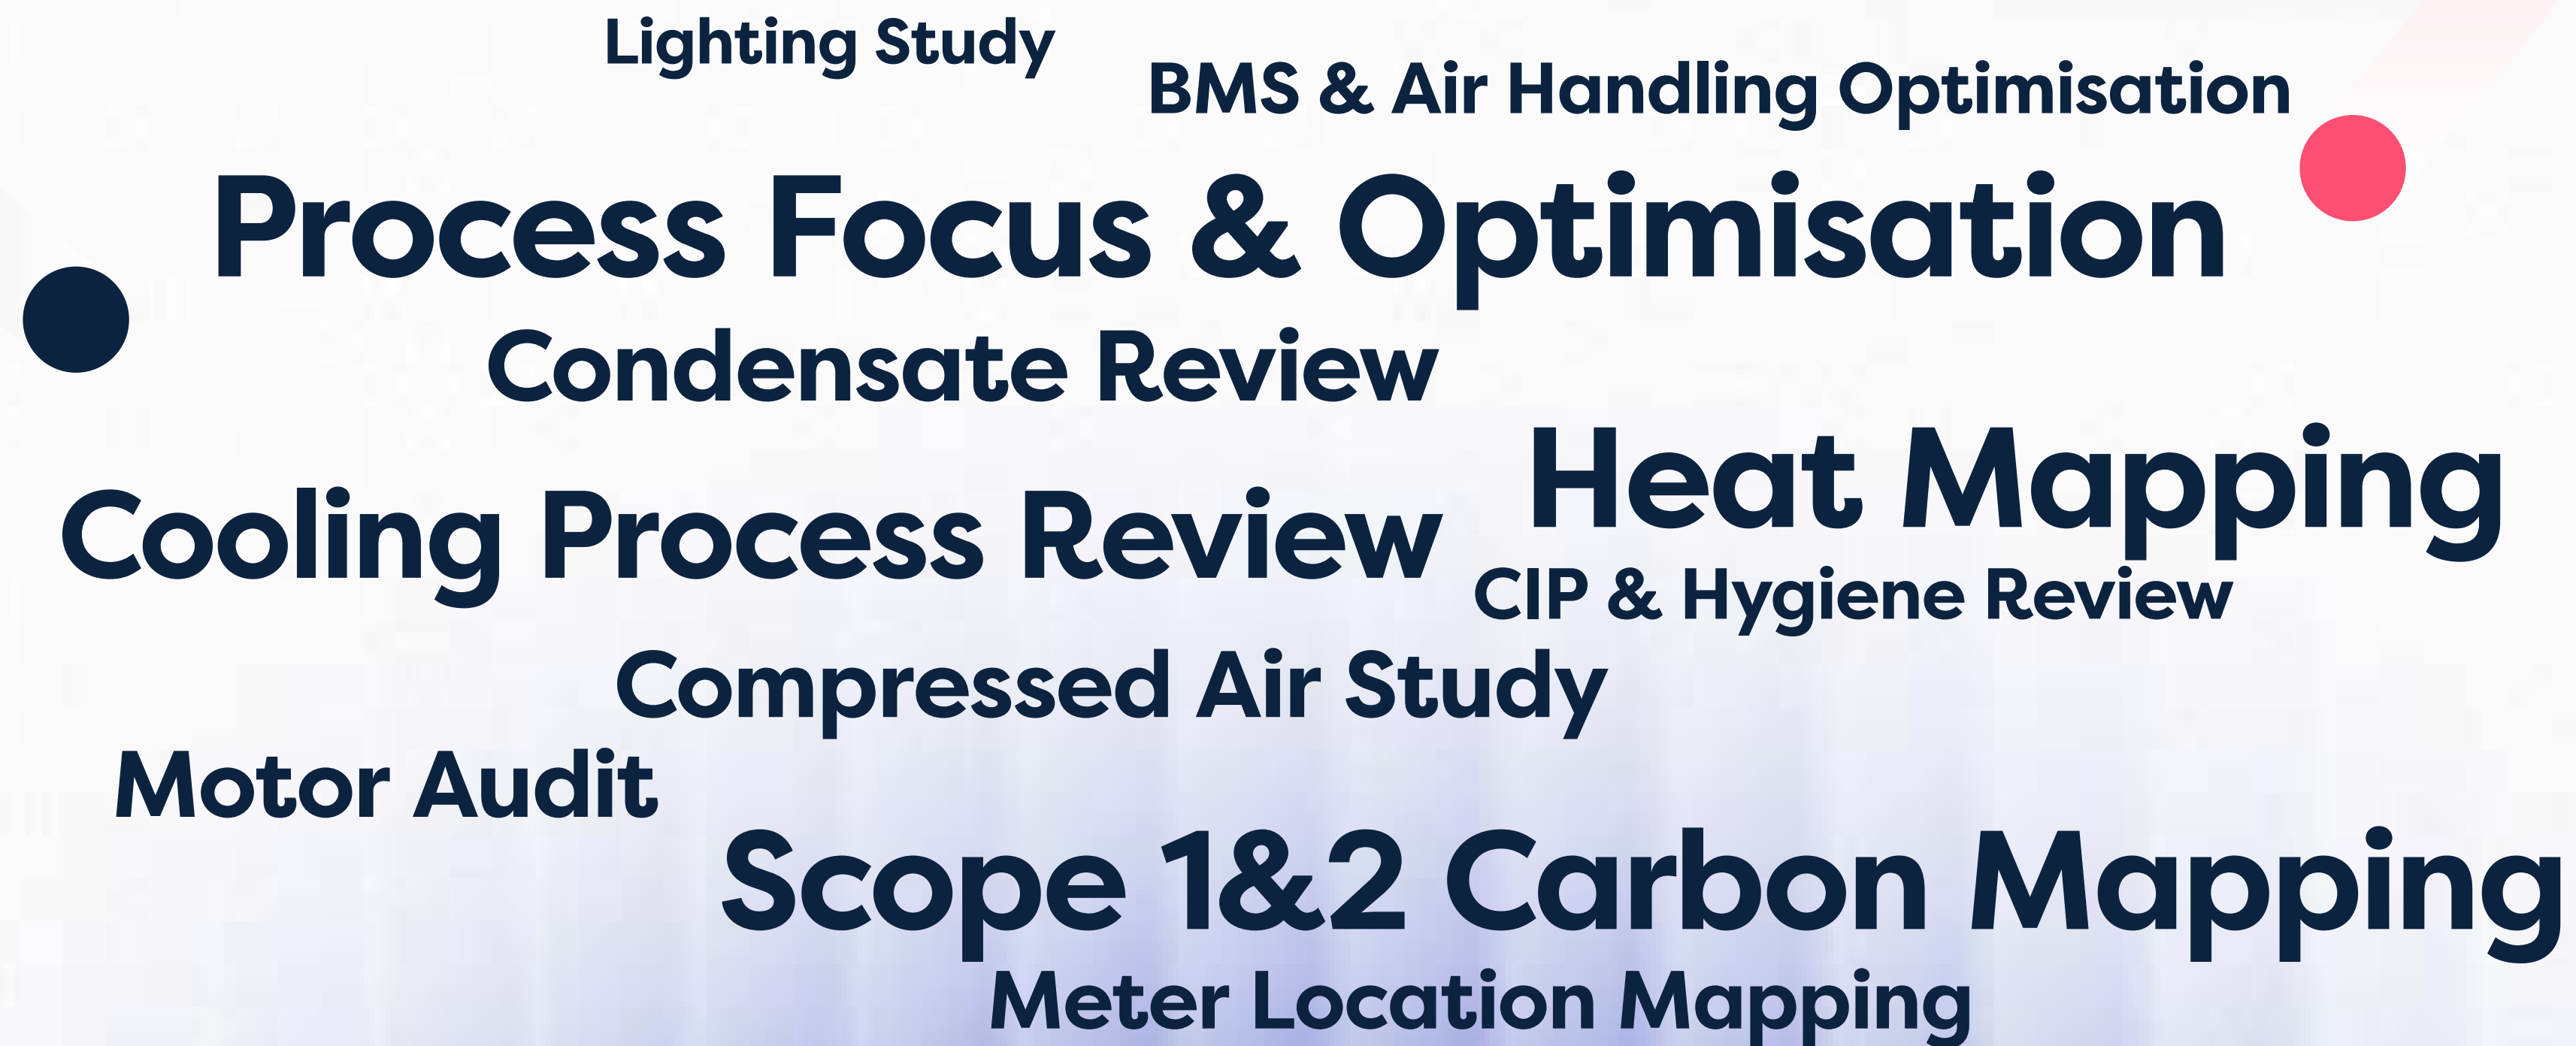

Onsite support allows for direct follow ups at the specific process areas. Opportunities can be further progressed and implemented rapidly. Use of Verco's industrial experience to identify opportunities not visible within the data.

Aggressive development of opportunities for in-year achieved savings

Prioritised and targeted development of step-change interventions. Building of business cases for CAPEX approval and saving verification.
