

# End-to-end energy management service

*“Rapidly identify the wins and de-risk energy management with a technology-backed, end-to-end service. This improves investment confidence and accelerates delivery.”*

**Thanos Patsos**  
Service Director  
Sustainable Transition  
Delivery

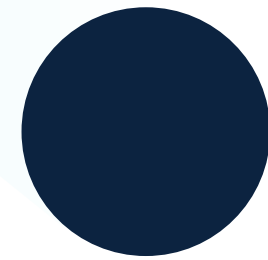

# End-to-end energy management service

## Is this you?

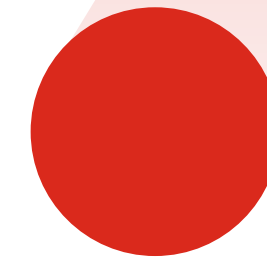

You are under pressure to deliver energy, cost and carbon savings.  
You have a lot of potential and you need to prioritise this fast.  
You have energy opportunities but need help turning them into funded, delivered projects.

## Drivers

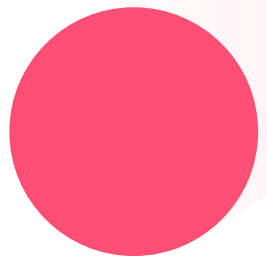

Energy, carbon and funding pressures are increasing, while delivery capacity is stretched  
Integration of systems, data and advanced technologies require appropriate governance and speed to improve competitiveness and provide confidence.

## How we help

We manage the full journey: prioritisation, business case, tendering, execution and continuous improvement.  
We deploy the latest technology to accelerate and sustain benefit generation

## Benefits

- High confidence in investment decision making with prioritised and funded investible business cases.
- De-risked and accelerated project development using latest technology, stage-gates and flexible commercial model.
- Measured, sustained and transparent cost and energy savings.

# End-to-end energy management with clear go/ no-go decision milestones

01

## Investment prioritisation (4-8 weeks)

- Assess savings rapidly
- Scout best-fit funding solutions
- Focus capital on proven, high-return opportunities with quantified ROI and payback.

Go/ No-Go decision with executable plan

02

## Scope, design solution & business case

- Reduce risk with deferred fee option.
- Build high-confidence cases with clear, measurable benefits.
- Establish a clear scope and funded plan to delivery.

03

## Vendors selection & tendering

- Identify best-value vendors through digital platforms.
- Secure favourable contractual terms.
- Accelerate project mobilisation.

Go/ No-Go decision with detailed investment plan

04

## Execution

- Deliver solutions on time, on budget and to spec.
- Enable real-time visibility through digital tools.
- Ensure performance through governance, KPI tracking and funding management.

05

## Continuous improvement

- Track and validate financial and environmental returns in real-time.
- Drive ongoing performance gains and additional value creation.
