

# PPN 006 (06/21) Carbon Reduction Plans

## Is this you?

You're bidding for public sector contracts worth over £5 million a year. In order for your tender to pass initial screening, you need a Carbon Reduction Plan (CRP) that meets PPN 006 requirements. But here's the challenge:

- The government guidance is complex and technical.
- Pulling together data across Scope 1, 2 and 3 emissions is time-consuming.
- You're not sure how to turn a basic compliance requirement into a transition plan that stands out and shows real ambition.

That's where Verco comes in. We help you tick every compliance box while solving the bigger problem: turning your CRP into a tool that strengthens your bids, demonstrates credibility, and sets you up for long-term success.

## Benefits abound

Verco makes your life easier, your bids stronger, and your business better positioned for a net zero future. With us by your side, you'll have more than just a compliant CRP. You'll have confidence that your bids meet all requirements set out by the UK Government, and clarity on your carbon journey. We'll take care of the technical detail so you can focus on winning contracts. And you'll have peace of mind knowing you're not only meeting today's requirements but preparing for future challenges too.

## The world is changing

Sustainability is no longer a “nice to have” – it's a requirement. The UK government has targeted to be Net Zero Carbon by 2050, and suppliers must show they are part of the solution. Government bodies, stakeholders, and customers are looking for partners who take climate action seriously.

If your business can't show a clear, credible path to reducing carbon, you risk being left behind – not only in public procurement but in the wider market too. Now is the time to act, and PPN 006 is the perfect opportunity to start.

## How Verco can help

At Verco, we take the complexity out of PPN 006 and deliver a clear, compliant, and credible Carbon Reduction Plan that works for your business. Our service includes:

- Data gathering & emissions reporting (Scopes 1, 2 and required Scope 3 categories).
- Interactive workshops to set targets, identify reduction initiatives, and build internal buy-in.
- A polished, fully compliant CRP, aligned with the government's template.
- Ongoing support to keep your plan up to date and make sure you're always procurement-ready.
