

Sustainability assurance and verification services

Is this you?

You are a real estate asset owner, manager or investment manager who needs to gain full confidence in the quality and accuracy of your GHG data, methodology, disclosures or strategy so you can make informed asset management decisions in your net zero journey.

Benefits abound

We use our expertise and track record in net zero and carbon accounting to give an expert opinion on GHG calculations, methodologies, and strategies. We provide a clear, robust, methodical, and transparent service, which identifies areas of improvement, and helps you gain complete confidence in the elements underpinning your net zero journey.

The world is changing

Increasing coverage and levels of assurance are required by legislation, standards, and benchmarking schemes. As the link between financial value and sustainability performance becomes more obvious, the importance of trust in sustainability disclosures and commitments is soaring.

How we help

Our assurance-related services include:

- Environmental reporting pre-assurance / assurance readiness.
- Assurance of utility and GHG data against primary evidence in line with ISO standards – or pre-assurance reviews.
- GHG accounting boundary and approach setting.
- Development of a GHG accounting methodology aligned with ISO 14064-1.
- Verification of a GHG accounting methodology using ISO 14064-3.
- Net zero strategy verification using the TPT framework.
- Reviews of risk identification and materiality exercises.
