The world is changing

Increasing amounts of assurance are required by legislation (e.g. CSRD), standards and benchmarking schemes. As the link between financial value and sustainability performance becomes more obvious, the importance of trust in sustainability disclosures is soaring.

How we help

We use our expertise in net zero and carbon accounting to provide an expert opinion on sustainability disclosures. Our assurance-related services, include:

- Data quality and completeness review in preparation for assurance.
- Assurance of utility data against primary evidence which can be used for various compliance purposes, e.g. GRESB
- Assurance of accuracy and appropriateness of carbon accounting methodologies.
- Review of risk identification and materiality exercises
- Expert review of a net zero strategy
