Independent assessments service

Is this you?

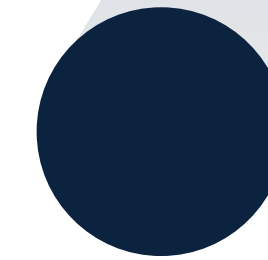

Your business requires a third party, independent review of energy/climate plans, emissions baselines, investment business cases or ESG compliance (including CSRD pre-assurance).

Drivers

The need for independent assessments is growing with push factors including; Investor/lender requests; M&A due diligence; sustainable finance criteria; regulatory and reputational verification.

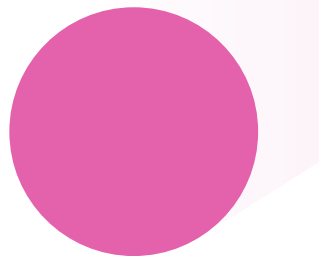

How we help

BIP.Verco is best placed to support you with independent assessments. We provide an integration of technical and reporting/pre-assurance capabilities. Some examples of our independent assessments offer include:

- Independent review of models and assumptions;
- verification of savings;
- energy/carbon price scenario stress testing;
- gap analysis vs standards (ISO, GHG Protocol, etc.) with actionable recommendations.

Benefits

- Increased credibility with the board and the market,
- reduced execution risk,
- access to/optimisation of financing and incentives.
